

Technical Assessment Instructions

As part of our evaluation process, you will be required to complete a structured technical assessment. This assessment is designed to evaluate both your technical expertise and professional competencies in a real-world working environment.

Pre-Assessment Instructions

- Before beginning the assignment, you are required to:
 - Email your **confirmed start time**
 - Share your **GitHub repository link** (ensure it has public access enabled)

This step is mandatory for tracking and evaluation purposes.

Work Submission & Tracking Guidelines

- You must have an **active GitHub profile**.
- Work on the assignment continuously and ensure:
 - Regular commits are made
 - Progress is clearly reflected through your commit history
 - All guidelines provided in the instruction document are followed
- Upon completion of the assignment:
 - Deploy your project on a server
 - Share the **live project link** along with your final submission
